

Internship Report

Of

[TOPIC: Design and Development of the Official Website of Lotus Academy]

Submitted

To

School of Computer Science and Engineering

IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of

B.Tech CSE

By

Roll Number of Student: 2410030625

Name of Student: HARSH CHOUDHARY

Batch: 2026-27

CANDIDATE'S DECLARATION

I Harsh Choudhary, Do hereby declare that the internship report titled “Design and Development of the Official Website of Lotus Academy” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to specially thank Ms. Dimple Jat, Principal, Lotus Academy, for granting me this internship opportunity and for her continuous guidance and feedback throughout the project.

INTERNSHIP COMPLETION CERTIFICATE

Date: 15 July 2026

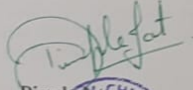

This is to certify that **Harsh Choudhary**, Enrollment No. 2410030625, a student of 3rd Year B-TECH CSE, IILM University, has successfully completed a Summer Internship at **Lotus Academy, Chittorgarh** as a **Web Development Intern** from 1 June 2026 to 15 July 2026.

During the course of this internship, Harsh designed and developed the official website of Lotus Academy from concept to deployment, including:

- A fully responsive, multi-page website built with HTML, CSS and JavaScript
- A custom visual design system based on the school's crest and branding
- An organised, categorised photo gallery of school events and functions
- An interactive, animated academic calendar (July 2026 – June 2027) with a content system for holidays, exams, and monthly activities

Throughout the internship, Harsh demonstrated sincerity, initiative, and strong technical ability. We found him disciplined, punctual, and receptive to feedback. We wish Harsh the very best for future academic and professional endeavours.

For Lotus Academy,

Dimple Khatun
Principal, Lotus Academy
CHITTORGARH
INSTITUTE

4. PROJECT DESCRIPTION

4.1 Introduction

This report documents the work carried out during a six-week summer internship (1 June 2026 – 15 July 2026) focused on designing, building, and deploying the official website for Lotus Academy, an English-medium co-education school (Nursery to Class 5) in Chittorgarh, Rajasthan. The internship was undertaken as part of the academic curriculum of the B.Tech (Computer Science and Engineering) programme at IILM University.

The scope of work covered the complete lifecycle of a small institutional website — requirement gathering from the school's Principal, information architecture, visual design rooted in the school's existing crest and branding, front-end development, content organisation of school event photographs into a structured gallery, iteration based on stakeholder feedback, and the development of an interactive academic calendar module.

4.2 Organization Profile

Lotus Academy is an English-medium, RBSE-affiliated co-education school located in Chittorgarh, Rajasthan, offering classes from Nursery to Class 5. Founded in 2016, the school has completed a decade of operation and is led by Principal Dimple Jat, who brings over 20 years of experience in early-childhood and primary education. The school runs a team of 10 teachers and maintains an active co-curricular calendar across the academic year, including Independence Day, Republic Day, Diwali, Dussehra, Teacher's Day, Annual Function, and Graduation Day celebrations, among others.

4.3 Problem Statement

Prior to this internship, Lotus Academy had no website or organised online presence. Parents and prospective families relied entirely on word-of-mouth and phone enquiries to learn about the school, its curriculum, and its activities. Photographs from the school's many events were scattered across individual phones and WhatsApp chats, with no central, presentable record. There was a clear need for a professional, mobile-friendly website that could represent the school's identity, showcase its decade of activities, and give parents an easy way to learn about and reach the school.

4.4 Project Objectives

- To design and develop a professional, mobile-responsive website for Lotus Academy from the ground up.
- To translate the school's existing visual identity (crest, colour palette, typography) into a cohesive web design system.
- To organise and present the school's event photographs as a structured, browsable gallery.
- To build an interactive academic calendar (July 2026 – June 2027) that the school can maintain independently without coding knowledge.
- To gain practical, end-to-end experience in front-end web development, UI/UX design, and stakeholder-driven iteration.

4.5 Scope of the Project

The project's scope was deliberately kept to a static, front-end-only website appropriate for the size and budget of the institution and the six-week duration of the internship. In scope: a four-page responsive website (Home, About & Principal, Photo Gallery, Contact), a categorised photo gallery, and a data-driven academic calendar. Out of scope for this phase: a server-side backend, database, online admissions form, and payment gateway — these are documented as recommended next steps in Section 4.9 and were consciously deferred rather than overlooked, given the timeline and the institution's current requirements.

4.6 Technologies and Tools Used

- HTML5 and CSS3 — semantic structure and a custom design system built without a CSS framework.
- JavaScript (ES6) — navigation, image lightbox, gallery filters, scroll-reveal animation, and animated statistic counters.
- CSS Grid and Flexbox — fully responsive, mobile-first page layouts.
- SVG clip-path — used to render the crest-shaped photo frames that appear throughout the site.
- IntersectionObserver API — powers the scroll-triggered animations and count-up statistics.

- Git and GitHub — version control and submission of source code.
- Google Fonts (Fraunces, Poppins) — the site's typographic system.

4.7 System Architecture

The website is a static multi-page site, structured as follows:

- index.html — Home page (hero, statistics, celebration highlights, Principal's quote)
- about.html — School story, Principal's profile, and full Principal's message
- gallery.html — Filterable, categorised photo albums by event/festival
- contact.html — Address, phone number, and embedded map
- assets/css, assets/js, assets/images — shared stylesheets, scripts, and categorised image assets

Being fully static (no server-side backend), the site can be hosted at no ongoing cost on platforms such as Netlify or GitHub Pages, or on standard shared hosting.

Table 4.1: Website Pages and Their Purpose

Page	Purpose
Home	Introduces the school, shows key statistics and celebration highlights
About & Principal	School's history and a full message from the Principal
Photo Gallery	Categorised, year-tagged photo albums of school events
Contact	Address, phone number, and location map

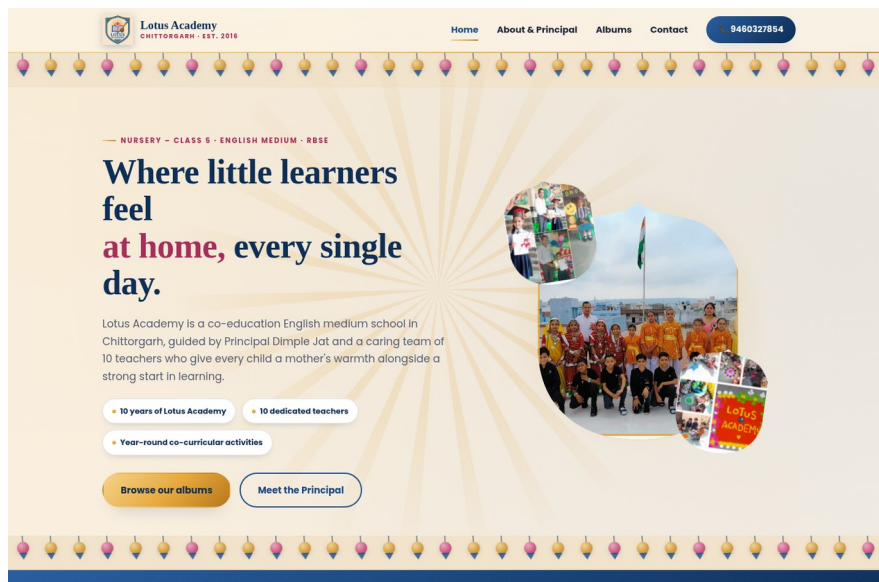

Figure 4.1: Home Page of the Lotus Academy Website

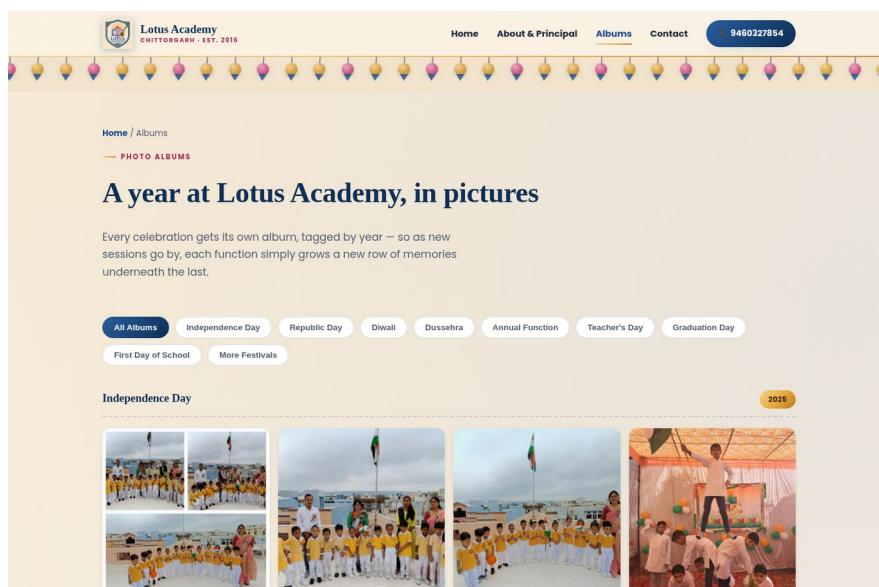

Figure 4.2: Photo Gallery Page with Filterable Albums

4.8 Methodology

The project followed an iterative, feedback-driven web development process:

- Requirement gathering — discussions with the Principal to understand the school's history, values, staff, and yearly calendar of events.
- Information architecture — deciding the site's pages and navigation structure.
- Visual design — building a design system directly from the school's existing crest, colours, and typography.

- Development — building each page with semantic HTML, custom CSS, and vanilla JavaScript.
- Content curation — sorting and categorising the school's existing event photographs into a structured gallery.
- Review and revision — presenting the first version to the Principal, and substantially reworking the visual design after feedback to align it more closely with the school's branding.
- Testing — verifying layout and usability across desktop and mobile screen widths (tested down to 390px) to ensure no overlap or cut-off content.
- Deployment — preparing the site for hosting on a static hosting platform.

Figure 4.3: Crest-Shaped Photo Frame Design Element

4.9 Expected Outcomes

- A professional, mobile-responsive online presence for Lotus Academy, usable by parents and prospective families.
- An organised, easily browsable archive of the school's event photographs, replacing scattered phone/WhatsApp storage.
- An academic calendar that school staff can update themselves — holidays, exam dates, and monthly activities — without needing a developer.
- A foundation for future features such as an online admissions enquiry form, a parent portal, and WhatsApp-based notifications (see recommended future work below).

- A real, deployed portfolio project demonstrating practical front-end development and stakeholder-management skills.

4.10 Internship documents (OFFER LETTER)

To, Harsh Choudhary Enrollment No: 2410030625 B-TECH CSE 5th Semester, IILM University		
Subject: Offer Letter for Summer Internship (Web Development & IT Systems)		
Dear Harsh,		
With reference to your application, we are pleased to offer you an internship position as a Web Development Intern at Lotus Academy, Chittorgarh, for the period from 1st June 2026 to 15th July 2026.		
During this tenure, you will work with our team to design, develop, and deploy the official web portal for Lotus Academy. Your key responsibilities will include gather requirements, UI/UX designing, responsive web development using HTML5, CSS3, and JavaScript, and deploying the solution.		
This is an unpaid internship undertaken as part of your academic curriculum at IILM University.		
We welcome you to Lotus Academy and wish you a successful learning experience.		
For Lotus Academy,		
  Principal, Lotus Academy
